RE: Coronavirus Relief Package - Direct Funding for Local Governments

Dear Representative Carbajal:

On behalf of the Rural County Representatives of California (RCRC), I am writing to share our appreciation and support for the House Committee on Oversight and Reform coronavirus (COVID-19) relief bill language that would provide desperately needed direct financial assistance for counties, including those with lower population thresholds.

RCRC is an association of thirty-seven rural, low-population California counties, and the RCRC Board of Directors is comprised of elected supervisors from those member counties. Like our counterparts in more urbanized areas, small, low-population counties remain on the front lines in responding to this deadly and costly pandemic. As such, our members firmly believe counties should receive direct federal assistance – as experienced recently by their urban counterparts - if there is to be another federal COVID-19 relief package.

In the closing days of the 116th Congress, a group of bi-partisan/bi-cameral lawmakers worked tirelessly to craft a comprehensive COVID-19 relief package. Despite the weeks of negotiations, the \$908 billion COVID-19 relief package that was enacted did not include assistance for state and local governments. This lack of assistance to state and local governments extended months of financial difficulty for small counties across the Golden State, coupled with a growing pandemic whose burden of response often falls upon RCRC members.

RCRC is encouraged to see aid for state and local governments is included in the House Committee on Oversight and Reform's reconciliation text and we ask for your support to ensure this language stays in any final COVID-19 relief package. After a year of this pandemic, many of California's rural counties have had to rely on the Newsom Administration along with approval of the California Legislature to receive monies that

were approved last March by Congress under the CARES Act. Simultaneously, counties continue to expend resources to meet their vast community health needs. Without direct, flexible, population-based aid, small counties in California and around the country will continue to face the economic realities of delivering needed and mandated services as the costly pandemic continues.

Again, RCRC fully supports the adoption of the \$350 billion proposal to provide state and local assistance and fully appreciates the distribution method being put forth by the House Committee of Oversight and Reform. If you should have any questions or concerns, please do not hesitate to contact me at psmith@rcrcnet.org or (916) 447-4806, or RCRC's legislative advocate in Washington D.C., Sheryl Cohen at cohen@acg-consultants.com or (202) 327-8100.

On behalf of the Rural County Representatives of California (RCRC), I am writing to share our appreciation and support for the House Committee on Oversight and Reform coronavirus (COVID-19) relief bill language that would provide desperately needed direct financial assistance for counties, including those with lower population thresholds.

RCRC is an association of thirty-seven rural, low-population California counties, and the RCRC Board of Directors is comprised of elected supervisors from those member counties. Like our counterparts in more urbanized areas, small, low-population counties remain on the front lines in responding to this deadly and costly pandemic. As such, our members firmly believe counties should receive direct federal assistance – as experienced recently by their urban counterparts - if there is to be another federal COVID-19 relief package.

In the closing days of the 116th Congress, a group of bi-partisan/bi-cameral lawmakers worked tirelessly to craft a comprehensive COVID-19 relief package. Despite the weeks of negotiations, the \$908 billion COVID-19 relief package that was enacted did not include assistance for state and local governments. This lack of assistance to state and local governments extended months of financial difficulty for small counties across the Golden State, coupled with a growing pandemic whose burden of response often falls upon RCRC members.

RCRC is encouraged to see aid for state and local governments is included in the House Committee on Oversight and Reform's reconciliation text and we ask for your support to ensure this language stays in any final COVID-19 relief package. After a year of this pandemic, many of California's rural counties have had to rely on the Newsom Administration along with approval of the California Legislature to receive monies that

were approved last March by Congress under the CARES Act. Simultaneously, counties continue to expend resources to meet their vast community health needs. Without direct, flexible, population-based aid, small counties in California and around the country will continue to face the economic realities of delivering needed and mandated services as the costly pandemic continues.

Again, RCRC fully supports the adoption of the \$350 billion proposal to provide state and local assistance and fully appreciates the distribution method being put forth by the House Committee of Oversight and Reform. If you should have any questions or concerns, please do not hesitate to contact me at psmith@rcrcnet.org or (916) 447-4806, or RCRC's legislative advocate in Washington D.C., Sheryl Cohen at cohen@acg-consultants.com or (202) 327-8100.

Sincerely,
